

ETF #2 (EXEQ) page structure

Design Link:

<https://www.figma.com/design/Zjw2sDzHb0CpNZGZrOnQiS/Wedbush-Funds?node-id=1655-1101&t=rcHEap0wN8m61mj6-1>

General Header menu

The **Our Funds** menu will provide direct access to individual ETF pages (ETF #2, ETF#3...). In addition, clicking **Our Funds** will lead to a centralized landing page that presents an overview of all available ETFs and serves as an alternative entry point to each dedicated ETF page.

CURRENT MENU

PROPOSED MENU

Design for the new menu should follow the same theme that already exists:

Footers

Every page on the website should have a **general footer** with following Disclaimer:

Carefully consider the Fund’s investment objectives, risks, charges, and expenses before investing. This and other information can be found in the Fund’s statutory and summary prospectuses, which may be obtained at WedbushFunds.com. Read the prospectus carefully before investing.

Investing involves risk, including the possible loss of principal. Shares of any ETF are bought and sold at market price (not NAV), may trade at a discount or premium to NAV, and are not individually redeemed from the Fund. Brokerage commissions will reduce returns.

Wedbush Funds are distributed by Foreside Fund Services, LLC.

ETF #2 page should have the following **fund-specific footer** Disclaimer:

The Solactive Indiggo ReturnOnLeadership® U.S. Large-Cap Index is comprised exclusively of equity securities of the 50 highest-ranked large-capitalization companies in the United States based on each company’s ReturnOnLeadership® (“ROL”) composite score.

AI Risk. The Index uses large language models and generative AI to create the ROL composite scores upon which inclusion in the Index is based. AI models may rely on techniques such as natural language processing and machine learning which are less transparent or interpretable and may produce unexpected results, which could adversely impact the Fund. If the content, analyses or recommendations of the AI models used by the Index are or are alleged to be deficient, inaccurate or biased, the Fund may be adversely affected. Additionally, AI tools used by the Index Provider, Adviser, or Indiggo

may produce inaccurate, misleading or incomplete responses that could lead to errors in decision-making, portfolio management or other business activities, which could have a negative impact on the performance of the Fund. There is no guarantee that the Index will reflect the exposures intended. The Index Provider relies on the integrity of the data being analyzed and its review processes could be adversely affected if erroneous or outdated data is utilized.

Calculation Methodology Risk. The Index relies directly or indirectly on various sources of information to assess the criteria of issuers included in the Index, including information that may be based on assumptions and estimates. Neither the Fund nor the Adviser can offer assurances that the Index's calculation methodology or sources of information will provide an accurate assessment of included issuers or a correct valuation of securities, nor can they guarantee the availability or timeliness of the production of the Index.

Concentration Risk. The Fund's investments will be concentrated in an industry or group of industries to the extent that the Index is so concentrated. In such an event, the value of the Shares may rise and fall more than the value of shares of a fund that invests in securities of companies in a broader range of industries.

ETF Page structure

Waiting for the logo file.

For now, copy paste the current IVES page design.

Arsen and Danijela will add all static info as soon as they would available.

Add placeholder information where we are missing that information.

EXEQ Logo¹

PLACE HOLDER: ²

There will be a few sentences of text here.

EXEQ

Wedbush ReturnOnLeadership[®] U.S. Large-Cap ETF

Overview Prices & Performance Holdings & Characteristics Fund Insights

This header should only be visible on the future landing page, and every ETF page would have a unique header.

Remapping existing short codes:
